City: Lisbon

Title of Project: Rehabilitation Center of Lisbon

City's Population: 2,166

In a few sentences, give a summary of the project and why it was needed:
The Rehabilitation Center of Lisbon is a 64 bed care center built in the heart of Lisbon, Iowa. Looking at the big picture, our vision was to create a contemporary environment that physically and aesthetically supports ABCM's core philosophy of care: Person Directed Care.

Explain the specific role of your city in this project:
The City of Lisbon played an integral role in ABCM's consideration of constructing a new center in Lisbon. The City was very cooperative and expeditious with plan reviews and coordination of development requests.

In a few sentences, what future impact will this project have on your community?
The Rehabilitation Center of Lisbon (RCL) was designed with clear ideas in mind as to how to best respond to the increasing needs and expectations of today's healthcare consumer. This project sets to deinstitutionalize the long-term care model and replaces it with life-enhancing amenities and features. The RCL aims to promote a heightened sense of well-being for our residents, ease of efficiency for the delivery of care from our staff and increased involvement from our surrounding communities.

Total cost of project: Approximately $12 million

List where funding came from. (grants, donations, city funds, etc):

Private Funds

Total time project took/projected to take for completion. Please include start date and end date. (To qualify the project must be operating or completed between January 1, 2016 and December 31, 2016):

Construction started November 15th, 2015; staffing and first phase completed October, 2016 with the first resident being admitted January 23rd, 2017.
